DETERGENT-LESS
Laundry System Trusted by HOSPITALS

NatureWasher™
The ultimate all natural cleaning system.
Did you know that there are an estimated 100 million E. Coli bacteria in each load of laundry you do? E. Coli is often associated with fecal matter.

Laundry detergents don’t kill germs

Many home washing machines in the United States contain deadly and dangerous bacteria. Most home laundry cycles don’t create a high enough temperature in order to sterilize laundry. Whatever germs go into the washing machine stay and fester, causing a nasty smell. Not only are clothes still contaminated after they have been washed, but they might actually contain more germs and toxins because of unseen gunk. This results in exposure to harmful chemicals on your skin due to detergent residue.

NatureWasher® kills bacteria and viruses that fester in every load of laundry.

LEARN MORE

What you Can’t See CAN Hurt you

NatureWasher® kills bacteria and viruses that fester in every load of laundry.
What’s Lurking in your Wash Wheel?

> E. Coli, Staph, Salmonella...

NatureWasher® attacks the gunk you can’t see for a clean, sanitized washing machine.

There are millions of germs left behind in your wash wheel. The gunk, due to detergent residue, is a reservoir of bacteria. This gunk continues to be picked up and deposited throughout the laundry cycle.

Your entire family could be exposed to the norovirus, often confused with stomach flu, through the sick laundry cycle.

Because NatureWasher® requires no detergent, there will be no gunk build-up. This can dramatically extend the life of the washer.

This gunk is so toxic that it has the ability to corrode through a metal wash wheel, resulting in unnecessary repairs and premature wearing of the washing machine.

A NatureWasher® user took his detergent-washed laundry and washed it again with NatureWasher®. The result was gunk-filled rinse water, proving that toxic detergent is left behind to be absorbed through your skin.
Alarmingly, many poisons found in laundry detergents disturb the natural chemical processes and development of the body which can lead to an array of health problems.

Stop Using Chemicals

Is Your Family Safe Using Detergent?

Is your laundry making them sick?

NatureWasher® requires no detergent, therefore eliminating potential harm.

The textile industry uses processes that leave chemicals on clothing that are endocrine disruptors. These chemicals are also used in your detergent. An endocrine disruptor inhibits natural hormones in the body.

Residual detergent may be left in your family’s clothing and absorbed through their skin. Some may even cause cancer, infertility and organ failure.

These poisons are absorbed into your skin, contaminate your washing machine and waste water, then seep into our environment and water supplies.

Europe has banned these poisonous ingredients used in the U.S.A. Even water treatment plants are unable to remove them.

The skin is the largest organ of the body. Toxins left in clothing have the ability to seep into the bloodstream through your skin.

LEARN MORE
The Obvious Dangers of Detergent

Imagine what is not reported

Childhood exposure to detergents as reported by poison control centers.

Children have an attraction to small, bright objects. Between January 1, 2015 and October 31, 2015, **10,497 children** ages five and under have been exposed to laundry packets. These poisonous detergent vessels are so concentrated that many children have been hospitalized after consumption.

If this poison makes children so violently ill, imagine what it might do over time being absorbed into your skin.

Your Health Might be at Risk

Common ingredients in laundry additives

- Benzaldehyde: mouth, throat, eye, skin irritation
- Ethylenediaminetetraacetic acid: affects reproduction and development
- Artificial Fragrance: skin and eye irritant, toxic, suspected carcinogen
- Diethanolamine: skin and eye irritant, toxic, linked to tumors and affects reproduction and development
- Quaternium-15: formaldehyde, a known carcinogen that causes respiratory and skin inflammation
- Ethyl acetate: irritant and neurotoxin
- Nonylphenol ethoxylate: hormone disruptor, affects reproduction
- Optical Brighteners: possibly affects reproduction and development
- Linear alkyl sodium sulfonates: skin and eye irritant, toxic to aquatic life, produces toxic fumes
- Petroleum Distillates (napthenes): chemicals linked to cancer and lung damage
Now that you know the ill effects...

Would you wash your face with E. coli infested towels?

NatureWasher® eliminates the nasty bacteria that detergents actually perpetuate in the sick laundry cycle.

Imagine drying your face, your dishes, and your children with all the nasty bacteria and toxins left behind in your towels. Ever notice that pungent smell emanating from your towels? It’s bacteria that cause the stink! Detergent does not kill bacteria.

With NatureWasher®, your towels will once again smell fresh and be bacteria and chemical-free. Most importantly, it disinfects your laundry. It’s all done without detergent or hot water, saving your family up to $700 per year.
How Does NatureWasher® Work?

1. The oxygen and PCO generators convert $O_2$ to $O_3$ to form powerful oxidation.

2. NatureWasher® uses PCO and diffuses ozone into the cold water of the wash cycle.

3. Bacteria and other microbes in your laundry are eliminated by ozone.

4. The result is soft, clean, sanitized laundry without the use of toxic chemicals!
NatureWasher® for the Entire Home

Clean Everything, not just the Laundry

LAUNDRY
No More Detergent
The average family can spend up to $650 a year on laundry detergents, fabric softeners and hot water! Naturewasher™ saves you money on all these unnecessary costs and keeps your laundry looking and feeling brand new.
- **NO** detergent
- **NO** hot water
- **NO** synthetic fragrances

FOOD
Enhance Your Flavor
Oxidized water is so effective at cleaning and disinfecting food that it's used in the food industry! Naturewasher™ easily and safely removes chemicals, pesticides, bacteria and other impurities without soap.
- Removes dirt, wax, pesticides
- Extends shelf life
- Less wasted food

HOME
Kill Germs & Odors
From your window's to your floors, Naturewasher™ is perfect for removing dust, dirt, and grime from hard surfaces, carpet and upholstery! Fill up your carpet shampooer, spray bottle or a even a regular bucket and experience results!
- Streak free glass windows
- Deep cleans carpet and tile
- Removes chemical residue

VEHICLES
No Soap Required
Cleaning your car has never been more simple! Let Naturewasher™ gently and effectively wash away dirt and buildup on your car. Say goodbye to all those cleaners, fill up a bucket of oxidized naturewasher water and start washing without rinsing!
- **NO** rinsing required
- Removes dirt and grime
- Removes soap scum

PETS
100% Safe & Natural
We can't always keep our pets from getting into a mess, but when they do, keeping your furry friends clean and odor free is important to all pet owners. Now you can wash and deodorize your pets and feel good about it.
- **NO** synthetic fragrance
- **NO** chemicals on your pet
- Deodorizes & refreshes
Why is NatureWasher® so Amazing?

Unique Features

NatureWasher® is engineered as a multi-purpose cleansing device.

NatureWasher® not only allows you to clean laundry without toxic chemicals, but your pets, home and food too!

With the included spray nozzle, you can rinse foods to remove dirt, wax, and pesticides. Sanitize common areas—everything from your windows to your carpet to your countertop. Even give your pets a bath! NatureWasher® will deodorize, refresh and remove nasty dirt and grime, regardless the chore.
